## **DETAILED ACTION**

Noted:

The term "to be electrically coupled" is similar to "can be electrically coupled" and not a positive claimed limitation.

### ***Claim Objections***

1. Claims 8 and 20 are objected to because of the following informalities:

Claim 8, line 1, change "a first end" - - the first end - -.

Claim 8, line 3, change "a second end" - - the second end - -.

Claim 20, line 1, change "a first end" - - the first end - -.

Claim 20, line 3, change "a second end" - - the second end - -.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 5-6, 8, and 19-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Cuevas (U.S. Patent 6,469,494).

Regarding claims 1, 5-6, and 19, Cuevas discloses an apparatus as shown in figures 1-5 comprising: a plurality of pliant conductive elements (30), each of the pliant element having first and second ends, the first end to be electrically coupled to a first electrical contact the contact being formed on a surface of the die 26) of a IC substrate, or package, or motherboard (26) and the second end to be electrical coupled to a second electrical contact (the contact being formed under surafce of an IC die (36), the pliant conductive element (30) including a pliant dielectric material (62, col. 4, lines 43-51).

As to claim 19, Cuevas discloses a device comprising:

an integrated circuit die (36) comprising a first plurality of electrical contacts (the contact being formed under surface of the die), an integrated circuit substrate (26) comprising a second plurality of electrical contacts (the contacts formed on a surface of the substrate 26); and an interconnect patch comprising a plurality of pliant conductive elements (30), each having first and second ends, the first end in physical contact with one of the first plurality of electrical contacts and the second end in physical contact with one of the second plurality of electrical contacts.

As to claims 8 and 20, Cuevas disclose the first end of a second one of the plurality of pliant conductive elements is to be electrically coupled or in physical contact to a third electrically contact of the substrate and the second end is to be electrically coupled or in physical contact to a fourth electrical contact of the die, see figures 2-3.

***Response to Arguments***

4. Applicant's arguments filed 11/22/06 have been fully considered but they are not persuasive.

Applicant argues:

Cuevas does not disclose the pliant conductive element having first and second ends and a dielectric material.

Examiner disagrees, as shown in figures 3-5, the element (30) having a dielectric material (62), one end contact to conductor (38) of the substrate and the other is electrical coupled to a contact of the die (the die having a plurality contact formed underneath of the die).

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
